Long-Term COVID-19: The Lasting Health Impacts of COVID-19

Message from the Guest Editors

A new SARS-CoV-2 virus causes severe infections resulting in both hospitalization and mortal outcomes or “mild to moderate” infections, for which people with COVID-19 are encouraged to recover at home, often while under little medical supervision. Even though as many as one in ten COVID-19 survivors suffer from long-term sequelae for many weeks or months after clearing the initial infection, this group has not received enough attention in clinical practice and research. The first datasets capturing the COVID-19 health experiences of these self-named “long haulers” were gathered based on these sufferers’ own initiative in the early summer of 2020 using social media. However, we still do not have healthcare structures meeting these patients’ healthcare demands for long-term follow up and rehabilitation. Therefore, this Special Issue published in the *Journal of Clinical Medicine* will gather up-to-date information on long-term COVID-19 sufferers and, hopefully, will contribute to greater awareness among clinicians, scientists, and researchers.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's (JCM)* staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
