Long COVID: Current Approaches and Clinical Challenges in Treatment and Rehabilitation

Message from the Guest Editor

Long COVID syndrome affects some COVID-19 survivors. The most frequently reported symptoms are fatigue and dyspnoea that last for months after acute COVID-19, alongside other persistent symptoms. Currently, there is limited information in the literature discussing the associated risk factors, their physiopathology, and the management of long COVID; therefore, more scientific evidence is required for the development of effective treatments and rehabilitation protocols for long COVID. The goal of this Special Issue is to provide an overview of recent advances in the field of long COVID, and to discuss the clinical challenges related to physiopathology, risk factors, diagnostic management, cost-effective approaches to interventions, the efficacy of treatments, innovative clinical perspectives, and the development of new rehabilitation protocols. Therefore, researchers in the field of long COVID are encouraged to submit an original article or review to this Special Issue (case reports and short reviews are not accepted). **Keywords:** coronavirus infections; management; physiopathology; risk factors; therapeutics; clinical medicine; rehabilitation

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
