Lung Cancer: Symptoms, Treatment, and Early Diagnosis

Message from the Guest Editor

Recently, four important innovations have emerged in the field of lung cancer diagnosis and treatment. The first is the validation of the critical role that low-radiation-dose CT screening plays in high-risk subjects. The second consists of technological innovations that have allowed us to achieve important goals in molecular diagnosis, circulating and volatile markers with implications for screening, noninvasive diagnosis, prognosis and prediction of early recurrence, and response to therapy. The third consists of the technological progress and evolution of micromechanics that have allowed us to introduce and diffuse robotic surgical tools, which allow us to perform high-quality, minimally invasive treatments in complex and locally advanced disease. The fourth consists of our improved knowledge and the new applications of immunotherapy and precision treatments.

I invite you to submit to this Special Issue an original research paper or a review article on one or more of these four important topics.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
