Lymphadenectomy for Genitourinary Cancers: Recent Advances and Future Perspectives

Message from the Guest Editors

Lymph node dissection has always been and still represents a matter of debate in the urologic community, especially for its oncological staging and therapeutic role. The shift from open to minimally invasive procedures—mainly robotic surgery—improved urologists' ability to perform more meticulous node dissections with an acceptable rate of complications. Differently, within the last two decades we have witnessed a decline in the use of lymphadenectomy for testicular cancers. The efficacy of the new cisplatin chemotherapy regimen makes it possible to safely perform lymph node dissection only in case of residual disease after chemotherapy. Following this trend, the introduction of sentinel lymph node dissection and the employment of robot-assisted lymphadenectomy in penile cancer reduced the morbidity associated with traditional open surgery. This Special Issue aims to highlight the recent advances, current role, and future perspective of lymphadenectomy in the context of diagnosis, treatment, and prognosis prediction for urologic malignancies.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
