Diagnosis and Treatment of Aortic Dissection: Experts' Views

Message from the Guest Editors

Acute type A aortic dissection continues to pose a major clinical challenge due to its sudden and unpredictable nature. Although recent advances have led to the identification of new risk markers, a substantial proportion of patients do not meet the current thresholds for preventive surgery at the time of dissection onset. This underscores the ongoing need to investigate additional mechanisms and risk factors underlying this devastating condition, in order to improve the management and outcomes of aortic dilatation. Advances in understanding the factors influencing ascending aortic dilatation have enhanced our ability to identify high-risk individuals. In this Special Issue, we aim to present the latest research on the flow dynamics, growth patterns, and risk prediction of acute type A aortic dissection. Through the integration of cutting-edge knowledge and multidisciplinary collaboration, we can make significant strides in addressing this critical clinical problem. About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
