Clinical Perspectives in Cardiac Imaging: How to See the Unseen

Message from the Guest Editors

The global relevance of cardiac and cardiovascular diseases is remarkable. Evidence and guidelines are constantly being updated, and, despite the focus on coronary artery disease and acute and chronic coronary artery syndromes, interest in other aspects of cardiac disease, including valvular disease, cardiac innervation, cardiac infections, transplanted heart, sarcoidosis, amyloidosis and cancer-related cardiotoxicity, is growing. Alongside clinical advances, more non-invasive imaging techniques are emerging and enhancing the definition and treatment of each condition. On the other hand, the implementation of artificial intelligence services at various stages of imaging acquisition and reporting enables the novel application of traditional cardiac imaging techniques. This Special Issue welcomes the submission of papers that provide clinical perspectives in cardiac imaging (including CT, MR, PET-CT and SPECT), addressing clinical feasibility, usefulness, diagnostic ability, and the prognostic value of new techniques.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
