State of the Art: The Current Concept of Multidisciplinary Management of Musculoskeletal Tumor

Message from the Guest Editors

Accounting for approximately 1% of all new cancers diagnoses globally, soft tissue and bone sarcomas are rare malignant tumors. As such, generating high-quality evidence for diagnosis and treatment is challenging. The heterogeneity of these tumors has hindered the development of robust, evidence-based treatment strategies, and therapeutic approaches are neither patient-specific nor widely standardized. In the past several decades, emerging state-of-the-art approaches and concepts, including but not limited to transdisciplinary collaboration, targeted therapy, personalized surgical planning, and 3D printing, have attracted a great deal of curiosity regarding musculoskeletal tumors. The aim of this Special Issue is to underline the value of state-of-the-art approaches for musculoskeletal tumors and to provide an overview on emerging topics in the multidisciplinary management of these diseases. We encourage submissions focusing on new clinical methods and tools for diagnosis and treatment as well as on new concepts based on clinical evidence.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
