

Special Issue

Diabetes Prevention and Intervention

Message from the Guest Editor

Diabetes mellitus (DM) increases the risk of cardiovascular complications and is one of the main determinants of adverse outcomes, including death, re-hospitalization, and functional decline (cognitive and physical), particularly in older adults. Therefore, it is important to achieve glycemic control to avoid complications. Furthermore, since endothelial dysfunction is common in DM, patients should be carefully monitored to prevent micro- and macrovascular complications. This Special Issue aims to summarize lifestyle and pharmacological interventions that could improve DM patients' quality of life. Intriguingly, hyperglycemia (irrespective of DM), insulin resistance, and pre-diabetes may be considered specific targets to reduce the risk of adverse events.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
