Recent Advances in Neurorehabilitation: Emerging Techniques and Technologies

Message from the Guest Editors

Neurorehabilitation has evolved significantly from its early foundations, incorporating compensatory strategies for lost functions, to incorporate a wide-range of emerging technologies aimed at functional recovery. This Special Issue is centered around the most recent advances in this dynamic field, aiming to highlight innovative research that extends the frontiers of neurorehabilitation through new techniques and technologies. We are particularly interested in contributions that explore cutting-edge developments such as neuroimaging analysis methods, cognitive rehabilitation, robotic aids, virtual reality, advanced neuroprosthetics, and novel pharmacological approaches. The scope of this Special Issue extends to experimental studies, comprehensive reviews, and case studies that provide not only state-of-the-art interventions but also insight into their practical applications and effectiveness. We invite submissions from researchers whose work promises to shape the future of neurorehabilitation, offering new hope and improved outcomes for patients worldwide.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
