

## Special Issue

# The Influence of Laparoscopic and Robotic Surgery on Abdominal Diseases and Current Clinical Treatments

### Message from the Guest Editors

Laparoscopic and robotic surgeries have gained wide acceptance among both patients and surgeons. Minimally invasive surgery has become the gold standard for cholecystectomy, appendectomy and anessectomy. Other conditions, such as hepatobiliary and pancreatic diseases and living organ transplantation, are now possible to treat by laparoscopy or several robotic platforms. In addition, other surgical specialties, including gynecology, urology and pediatrics, have witnessed the increased adoption of minimally invasive surgery. For these reasons, we invite you to participate in this Special Issue aiming to report the techniques, current treatments, ongoing research, and short- and long-term outcomes of robotic or laparoscopic surgery. Furthermore, any comparison between robotic and laparoscopic surgery is also advisable.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
