Clinical Prevention and Treatment of Graft-Versus-Host Disease (GVHD)

Message from the Guest Editor

Graft-versus-host disease (GVHD) is a major complication following allogeneic hematopoietic stem cell transplantation (HSCT), characterized by immune-mediated tissue damage resulting from the recipient's immune system attacking the donor's cells. GVHD is classified into acute and chronic forms, with both posing significant risks to patient outcomes, including morbidity, mortality, and long-term health complications. It is a critical challenge in the field of transplant medicine, particularly in the context of improving post-transplant quality of life. This Special Issue on the Clinical Prevention and Treatment of Graft-versus-host disease (GVHD) will focus on the evolving strategies in the prevention and management of GVHD, including novel immunosuppressive regimens, advances in biomarker discovery, and promising therapies. It will also explore the emerging role of post-transplant interventions aimed at reducing chronic GVHD and improving long-term patient survival and quality of life.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
