Clinical Perspectives on Atrial Fibrillation

Message from the Guest Editor

Atrial fibrillation (AF) remains a critical focus in cardiovascular research due to its increasing prevalence and complex management. Recent advancements have highlighted the importance of identifying new risk factors, such as environmental influences (e.g., air pollution), alongside established ones like chronic kidney disease (CKD), which complicates AF management and worsens outcomes. Innovative treatment approaches, including advanced catheter ablation and antiarrhythmic drugs, are expanding the therapeutic options. Precision medicine is offering tailored treatments for patients with comorbidities like CKD or those exposed to environmental risks. In this Special Issue, we welcome the submission of review articles and original research focusing on the latest advances in AF research, including novel risk factors, innovative treatments, and interactions between AF, comorbidities, and invasive procedures, alongside papers on new methods for registering and assessing AF, with the overall aim of improving AF management and patient outcomes.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
