

## Special Issue

# Recent Clinical Advances in Macular Degeneration and Retinal Diseases

### Message from the Guest Editor

Age-related macular degeneration (AMD) and retinal diseases warrant early diagnoses and prompt treatments to avoid vision loss or a significant reduction in patients' quality of vision. Lately, technical advances in fundus imaging modalities, such as optical coherence tomography (OCT) and OCT angiography, have offered novel insights into retinal and choroidal diseases.

Additionally, the treatment outcomes of vascular endothelial growth factor (VEGF)-related diseases, such as AMD, diabetic macular edema, and retinal vein occlusion, showed significant improvements following the advent of anti-VEGF therapy. Furthermore, technological innovations, such as minimally invasive vitrectomy significantly improved the prognosis of surgery performed for incurable diseases including retinal detachment and proliferative diabetic retinopathy. It is important to closely monitor progress in the evaluation and treatment protocol for macular degeneration and retinal diseases. This Special Issue of the *Journal of Clinical Medicine* focuses on recent clinical advances in macular degeneration and retinal diseases.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
