

Special Issue

Male Reproductive Dysfunction, Disorders and Infertility

Message from the Guest Editors

Reproductive health is an important component of men's overall health and well-being. Any deviation from the physiological function of male reproductive organs can either directly or indirectly have a negative impact on the reproductive outcome. The most common issues with male reproductive health are male infertility and sexual dysfunction. Nearly 20–30% of infertility problems are mainly due to abnormalities or defects with the male reproductive organs. Recently, both clinical and basic research in male reproduction has gained more attention and seen substantial advancements. For this Special Issue, we invite authors to submit an original research article or a comprehensive review article related to male reproductive disorders, men's sexual health, and/or male infertility.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
