The Management of Craniofacial Anomalies—a Multi-Disciplinary Team Approach

Message from the Guest Editor

The craniofacial region is a complex area and important component of the human anatomy. Multiple functions of cognitive understanding, perception, visualization, gestation, nutrition, and jaw articulation occur in this region. It is also an area where the human person is perceived and provides confidence and self-esteem. About 1% of all newborns are potentially born with a craniofacial anomaly or deformity. In addition, other forms of craniofacial anomalies may be acquired after birth or detected after growth-related disorders. Due to the complex nature of the anatomy, the anomalies of the craniofacial region need to be managed by a multi-disciplinary group of healthcare providers, and the treatments often span decades of life. This journal Issue focuses on some of the multi-disciplinary team approaches and also the latest clinical best practices.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
