Management of Obstructive Sleep Apnea (OSA)

Message from the Guest Editor

Obstructive sleep apnea represents a public health problem by its strong incidence with the aging of the population and the obesity epidemic, of which we are all witnesses. The cost-effectiveness of the diagnostic methods and the treatment modalities of this pathology should indisputably be rediciled. New and important information is expected on the factors of compliance with different treatments, but behavioral therapeutic methods will have to find their place in the future. Changes in lifestyle habits to fight against (increasing) sedentary lifestyle, but also the early management in childhood of developmental anomalies of the elements of the mandibular/masticatory system must be included in the management. Finally in adults at high cardiovascular risk and the elderly, clarification of the “good indications” of treatment (in particular for continuous positive pressure) should be proposed. The purpose of this Special Issue will therefore be to present original research work centered around these new questions.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
