# Management of Periprosthetic Fractures: Current Experience and Future Developments

### Message from the Guest Editor

As the number of arthroplasties is still increasing not only in hips and knees, but also in shoulders and elbows, the number of complications is also rising. While periprosthetic infections are still the most common complication, periprosthetic fractures are a frequent problem that we have to deal with in daily clinical routines. Poor bone quality, patients with the inability to perform partial weight-bearing, and the necessity for special implants make these cases very challenging for both the surgeon and the patient. The main goal of regaining function and restoring a patient's independence cannot always be achieved. With this Issue, we would like to give a comprehensive overview on the current state-of-the-art of periprosthetic fracture treatment in both the upper and lower extremities. We would be pleased if you could support us with your great experience in this field, and therefore help us to provide the best information and evidence for our readers.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of  
Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
