Safety and Effectiveness of Medication in Elderly Patients

Message from the Guest Editor

The elderly constitute a growing world population group, with more than 200 million people over 60 years of age. Elderly persons often suffer from multiple chronic conditions, and consequently polypharmacy is frequent. However, elderly persons are particularly susceptible to adverse drug events or interactions with other drugs due to their physiological changes, genetic predisposition, and environmental exposure. Consequently, integral and multidisciplinary approaches to promote and implement appropriate prescription and medication use in the elderly is warranted.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
