Advances in Metabolic Myopathies

Message from the Guest Editors

On behalf of the Journal of Clinical Medicine (JCM) Editorial Team, we are delighted to present a new Special Issue on the topic of “Advances in Metabolic Myopathies”, Guest Edited by and , from the Center for Neuromuscular Diseases, Unit of Neurology, ASST Spedali Civili Brescia, Italy. Metabolic myopathies are a clinically and etiologically heterogeneous group of diseases, including muscle glycogenosis, fatty acid-related myopathies, and mitochondrial respiratory chain defects. Their clinical spectrum is very wide and ranges from infantile-onset to adult-onset forms and includes fixed myopathies, exercise-related myopathies, and multisystem diseases. Diagnosing these disorders is often puzzling because of their heterogeneity and possible misdiagnosis. The present Special Issue aims to provide non-specialist physicians in myology the tools to suspect a metabolic myopathy and to know current and future therapeutic options.

Guest Editors

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
