The Role of the Microenvironment in Multiple Myeloma: From Biology to Clinical Practice

Message from the Guest Editor

Multiple myeloma (MM) is an incurable hematological malignancy characterized by bone marrow (BM) infiltration by clonal plasma cells. Myeloma pathophysiology depends on several oncogenic events occurring in MM cells, and on extracellular factors, such as dynamic interactions between MM cells and the BM microenvironment, which are attributed to the clinical presentation of MM as well as to the progression of the precursor state of monoclonal gammopathy of undetermined significance (MGUS) to overt MM. Bone marrow microenvironment can be functionally divided into a cellular and non-cellular compartment, each of which have components playing distinct but interacting roles in the progression of MM. In this Special Issue, we will discuss the role of the BM microenvironment in MM cell growth and disease progression, as well as how this knowledge could be incorporated into the therapeutic design, to prevent MM progression, improve survival, and offer to our patients in the clinical setting a probability of cure.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2026).
