

## Special Issue

# Minimally Invasive Management of Urologic Oncology

### Message from the Guest Editor

The management of urological cancers has dramatically changed in the last 20 years; with the introduction of several technological innovations and the refinement of minimally invasive techniques, surgical oncologic treatment algorithms have become more and more complex.

In fact, the role of major oncologic surgery, in most cases considered the gold standard for the treatment of localised urological neoplasms, has lately been downsized, with new organ-sparing options being recommended as the first-line treatment by international guidelines.

The evolution of imaging has also had a crucial role in enhancing targeted and minimally invasive treatments. The refinement of robotic surgery has contributed to the lower morbidity of major surgery.

In this Special Issue of JCM, we aim to publish up-to-date reports on the new challenges in uro-oncology under the motto of "less is more".

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

### Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000  
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
