

Special Issue

Treatments in Myocardial Ischemia, Valvular Heart Diseases, and Heart Failure

Message from the Guest Editors

Cardiovascular diseases are responsible for almost 18 million deaths annually, which represents around 30% of total yearly mortality. Heart disease is the number one cause of death in the USA, and within this group, heart failure, valvular heart disease, and myocardial ischemia are some of the most important entities. In recent years, we have witnessed new, extraordinary, and promising medical and surgical treatments to treat and prevent these three entities. In this issue, we welcome systematic or literature reviews and original articles focused on the treatment of heart failure, valvular heart diseases, and myocardial ischemia. Articles or meta-analyses on new medical devices or treatments are especially welcome, but all of them must be methodologically sound and rigorous.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
