Clinical Updates on Rheumatoid Arthritis

Message from the Guest Editor

Rheumatoid arthritis (RA) is a chronic inflammatory systemic disease induced by a complex interaction between shared epitope genes, microbiota, innate immune mechanisms, autoimmunity, and environmental factors, including tobacco, that primarily involves synovial joints, but that might also evolve into interstitial lung and cardiovascular diseases, and rarely, vasculitis. In recent years, the research progress has highlighted that there may be different RA patterns reflected by biopsy-based biomarkers and that are gender oriented. Furthermore, the advances in imaging technology, particularly MRI and ultrasonography, have led to an earlier diagnosis of active and erosive pre-radiographic disease. Recent guidelines for the treatment of RA include the use of JAK inhibitors along with the best known traditional biologic treatments, but the increasing number of therapies might be sometimes confounding. Hopefully, the possibility to match laboratory, gender, imaging, and histological characteristics and systemic disease might lead to a more tailored choice of treatment in the near future.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
