

Special Issue

Recent Advancements and Challenges in Cardiac Arrhythmias: Part II

Message from the Guest Editors

It is my pleasure to invite you to contribute to the Special Issue entitled “Recent Advancements and Challenges in Cardiac Arrhythmias: Part II”. This is a new volume, proceeding from the six papers we published in the first volume. For more details, please visit:

https://www.mdpi.com/journal/jcm/special_issues/E8TSPEVS08

Sudden death can be the first manifestation of a lot of pathological conditions. Novel algorithms for the identification of sudden cardiac death risks have been proposed, but more efforts are necessary to avoid this dramatic event. On the other hand, overtreatment, particularly in young patients, is not necessarily beneficial and must be avoided. This Special Issue of the *Journal of Clinical Medicine* will focus on recent improvements and findings in the field of risk stratification for sudden death. Furthermore, papers are welcome that summarize the current state of knowledge related to specific diseases, underscoring potential gaps in our evidence.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief
