

Special Issue

Clinical Management of Colorectal and Rectal Surgery

Message from the Guest Editor

Colorectal surgery refers to surgical procedures performed on the colon and rectum for various conditions including colorectal cancer, inflammatory bowel disease, diverticulitis and other diseases. These colorectal conditions seriously interfere with the normal function of our intestines. Surgery can be an effective modality to treat several stages of these diseases. In surgery, laparoscopic surgery has been widely accepted. Some other technologies, such as single-incision laparoscopic surgery, robotic technology, augmented reality and natural orifice specimen extraction, are evolving.

This Special Issue aims to provide a communication platform for the clinical management of colorectal and rectal surgery. We, therefore, encourage submissions of papers describing related original research, experiences of surgical techniques, or reviews about colorectal and rectal surgery.

- colorectal surgery
- surgical management
- surgical techniques
- laparoscopic surgery
- patient outcome

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
