

## Special Issue

# Migraine and Headache: Clinical Presentation, Treatment, and Management

### Message from the Guest Editors

Dear colleagues, This Special Issue will focus on non-headache presentations of migraine. Rather than headache characteristics, we wish to focus on premonitory phases, different presentations of aura, triggers, comorbidities, and differential diagnostic gaps in clinical practice. We will propose the importance of holistic approaches and low-budget solutions, taking into account realities from all over the world.

Additionally, we will discuss the roles of new realistic techniques of lifestyle regulation and non-pharmacological therapies. Finally, we wish to open some windows about management gaps in perspective and age-gender-cultural differentiation. We also wish to discuss the importance of refractory cases that require additional interventional therapies, as well as providing some brief reports on them. We are inviting you to share your evidence-based data with us in order to improve our overall daily headache practice. Please do not hesitate to contact us at any step.

Prof. Dr. Aynur ÖZGE

## About the Journal

### Message from the Editorial Board

*Journal of Clinical Medicine* (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.
