Advances in Diabetic Foot, Its Complications and Related Diseases

Message from the Guest Editors

Diabetic foot (DF) is a leading cause of disability and early mortality in people with diabetes. It also represents a paradigmatic example of how the collaboration between clinical and basic researchers together with multidisciplinary health professionals can represent an added value for the improvement in all health goals in people with DF, even overcoming the recent storm of the COVID-19 pandemic. Furthermore, this complication appears to affect males far more than females, while little is known about gender differences in the risk of adverse outcomes in people with DF. Consequently, original contributions on this new theme are welcomed, justifying the presence of a Co- with renowned expertise about this aspect (Prof. Franconi). In conclusion, the purpose of this Special Issue is to provide a comprehensive overview of the up-to-date clinical aspects of DF disease, including the use of innovative techniques and technologies in interventional therapies. For this reason, we encourage multidisciplinary researchers in the field of DF and related diseases to submit their findings as original articles or reviews to this Special Issue.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
