# Advances in the Diagnosis and Treatment of Ocular Surface Tumors and Diseases

### Message from the Guest Editors

The ocular surface is a complex and dynamic environment that can be affected by a wide spectrum of benign, premalignant, and malignant tumors, as well as inflammatory and degenerative diseases. Recent advances in diagnostic technologies—such as high-resolution anterior segment imaging, confocal microscopy, and molecular diagnostics—have enhanced our ability to accurately detect and characterize these conditions at earlier stages. Concurrently, novel medical and surgical therapies, including topical chemotherapeutics, immunomodulatory agents, and minimally invasive surgical techniques, have transformed the management of these challenging disorders. This Special Issue aims to highlight cutting-edge research and clinical advancements in the diagnosis, imaging, pathophysiology, and treatment of ocular surface tumors and diseases. We welcome original research articles and reviews that contribute to improved understanding and patient care in this rapidly evolving field.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
