Rehabilitation and Management of Stroke

Message from the Guest Editor

Globally, stroke is the second-leading cause of death and the third-leading cause of death and disability combined.

At the same time, organized stroke rehabilitation, provided by multi-disciplinary teams that manage stroke survivors, is substantially improving functional outcomes and reducing stroke-related disability.

The brain is sub-serving, so there are many different functions that all need to be considered when it comes to neurorehabilitation in people with brain damage and related neuro-disabilities after stroke.

In this context, clinical decision making is best informed by neuroscientifically grounded evidence from clinical trials with adequate populations, clinically applicable interventions, relevant comparisons, and clinically relevant outcomes (PICO).

Therefore, in this Special Issue, papers that could inform clinical decision making and service implementation are particularly welcome, including reviews of effectiveness, RCTs of stroke rehabilitation interventions, comprehensive reviews on implementation science, and research papers in the field of stroke rehabilitation.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
