Ablation, Embolization, and Stenting: Current Trends in Interventional Radiology

Message from the Guest Editor

Interventional Radiology (IR) is transforming modern medicine through its minimally invasive, image-guided therapies. This Special Issue, *“Ablation, Embolization, and Stenting: Current Trends in Interventional Radiology,”* explores key advancements and clinical applications of these cornerstone techniques. Ablation—both thermal and non-thermal—now offers curative options for non-surgical oncology patients.

Embolization, including techniques like TACE and prostate artery embolization, continues to expand treatment possibilities across specialties. Stenting remains critical in both acute and chronic care, with innovations enhancing safety and longevity. We invite original research, reviews, and technical reports that reflect the latest trends and innovations. This Special Issue aims to inform clinical practice, drive innovation, and highlight IR’s growing role in multidisciplinary care and the future of minimally invasive treatment.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
