Alcohol-Related Liver Disease: Diagnosis, Treatment, and Management

Message from the Guest Editors

Hepatic pathology remains a cornerstone in medical research, offering vast opportunities for innovation and discovery. Alcoholic liver disease, probably the most widespread chronic liver condition globally, impacts a substantial patient population. Many individuals seek medical attention only when severe complications arise, which can lead to irreversible damage or even death. This places considerable strain on healthcare systems, underscoring the urgent need for accessible, cost-effective diagnostic tools and treatments capable of halting disease progression and promoting full recovery. The effective management of liver disease yields extensive benefits, improving outcomes for patients, easing the burden on healthcare professionals and systems, and positively impacting society as a whole. These considerations highlight the need for thorough investigation and further research into the multifaceted challenges posed by alcohol-related liver disease. We eagerly anticipate your valuable contributions and will facilitate meaningful dialogue that inspires transformative advancements in gastroenterology.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
