Advances in Thrombotic Disorders and Antithrombotic Treatments

Message from the Guest Editors

Venous thromboembolism (VTE) is a chronic disease that affects nearly 10 million people every year worldwide. Cardiovascular disorders (CVDs) remain the most common cause of death in Europe. Both VTE and CVD are associated with potentially preventable morbidity and mortality. All novel direct oral anticoagulants introduced in the last few years have shown a favourable benefit–risk balance in terms of efficacy and safety profile, both in the prevention of thromboembolic events in atrial fibrillation and in the prevention and treatment of VTE. Ongoing research is, nowadays, focused on intensifying the use of oral anticoagulants in different clinical indications and, at the same time, on developing safer anticoagulant drugs, as well as improving diagnostic strategies and further personalizing approaches for the prevention and management of thrombotic disorders. The aim of this Special Issue is to highlight recent advances related to the prevention, diagnosis, treatment and prognosis of several thrombotic conditions.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
