Clinical Advances in Aortic Aneurysm

Message from the Guest Editor

Considerable advancements have been made in the minimally invasive management of aortic aneurysm in the last two decades, from the total percutaneous approach to novel low-profile and incredibly conformable stent grafts, passing through the development of dedicated software for vessel analysis, fusion technique imaging, and, lastly, the application of artificial intelligence. We have today a huge armamentarium of devices, including a variety of custom-designed or off-the-shelf solutions to cope with complex aortic diseases. This technological evolution has made sure that more and more patients with a complex aortic pathology can today be managed with ease and a degree of invasiveness which were previously unthinkable. This Special Issue aims to provide a comprehensive review of the latest endovascular solutions for the treatment of complex aortic disease. It will also focus on the prevention of major complications in the arch and thoraco-abdominal field as well as the intra- and post-operative management of patients. It will also cover some rare conditions, such as aortitis and genetically triggered aortic disease.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
