Foot and Ankle Fracture Management and Complication Insights

Message from the Guest Editor

We aim to provide a comprehensive overview of foot and ankle fracture management by bridging fundamental anatomical insights with clinical decision-making. We emphasise the critical role of clinical anatomy, including osseous morphology, ligamentous structures, vascular supply, and surrounding soft tissue envelopes, in understanding fracture patterns, guiding surgical approaches, and preventing complications.

We welcome original research and systematic reviews which address contemporary surgical techniques, minimally invasive approaches, and patient-specific treatment algorithms. Additionally, studies focusing on complication risk factors, predictive modelling, and long-term functional outcomes will be of high interest. The integration of advanced imaging modalities, such as weight-bearing CT, as well as emerging technologies including artificial intelligence and biologic augmentation for fracture healing, will also be highlighted.

- Foot and ankle fractures
- Clinical anatomy
- Trauma management
- Surgical techniques
- Complication prevention
- Nonunion and malunion
- Post-traumatic arthritis
- Minimally invasive surgery
- Functional outcomes
- Translational research

About the Journal

Message from the Editor-in-Chief

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andr s

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2026).
