Innovation in Hand Surgery

Message from the Guest Editors

This Special Issue dedicated to "Innovation in Hand Surgery", which is a compilation of cutting-edge research and advancements in the field. As hand surgery continues to evolve, embracing new techniques and technologies, it is imperative to share these developments with the broader medical community. This Special Issue encompasses a diverse range of topics, reflecting the multifaceted nature of hand surgery. Articles will explore the latest surgical techniques, including new reconstruction strategies, that promise improved outcomes for patients. Additionally, the Special Issue delves into the integration of advanced imaging technologies, such as computer-assisted practices, which are revolutionizing preoperative, intraoperative and post-operative clinical practice. Innovative approaches to rehabilitation, a crucial aspect of post-surgical care, will also be highlighted. The contributions in this Special Issue underscore the importance of interdisciplinary collaboration and continuous innovation in enhancing patient care. We trust that the insights provided herein will inspire further advancements and foster a deeper understanding of the dynamic field of hand surgery.
