Pediatric and Adolescent Nephrology Facing the Future: Diagnostic Advances and Prognostic Biomarkers in Everyday Practice

Message from the Guest Editors

Impaired renal function leading to chronic kidney disease is a major clinical problem in children/adolescents and in adults. Screening for early diagnosis of impaired renal function may enable more effective prevention and slow the progression of the disease. While the ultimate goal is to find new therapies needed to minimize the progression of renal injury, the interests of clinicians have focused on the potential role of body fluid markers. That is why there is still ongoing search for new biomarkers that would present with high sensitivity and specificity for early renal damage. The aim of this Special Issue is to gather original articles and reviews demonstrating advances in the diagnosis and treatment of various kidney disease in children. Original research articles, systematic reviews, and focused review articles are welcome. Articles focused on *novel biomarkers* used in the diagnostic and prognostic evaluation of common *kidney diseases in children* are especially encouraged.

About the Journal

Message from the Editorial Board

Journal of Clinical Medicine (ISSN 2077-0383) is an international, peer-reviewed, open access journal dedicated to advancing clinical and preclinical research. Our Editorial Board and staff are committed to delivering cutting-edge, timely, peer-reviewed articles spanning the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and impactful research articles, as well as reviews that are clinically significant and relevant to the full spectrum of medical disciplines. All full texts are archived in PubMed Central and indexed in SCIE (Web of Science), Scopus, PubMed, and other major databases. We invite you to submit your manuscript for publication, as well as join our community as a reviewer or reader online.

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, The University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
