Neuro-Orthopaedics: Orthopaedic Managements of Musculoskeletal Problems Caused by Neuromuscular Disorders

Message from the Guest Editor

The wide array of neuromuscular disorders of congenital, hereditary, and acquired origins affect the growth of the spine and extremities in children and adolescents, and produce varying degrees of mobility issues. Management is challenging in adults as well, and losing the ability to properly move any parts of the body can de-grade the rest of their life. Although the multidisciplinary team approach is essential for the patients with neurological impairments, the orthopaedic surgeon should be attuned to important surgical strategies for each neurological condition and for specific changes in motor function peculiar to the site and extent of involvement. For this Special Issue we would like to invite authors to submit their original papers or review articles on orthopaedic approaches to the problems of the spine and extremities of all ages based on the etiology, the location of involvement, and the degrees of deformities produced; these include but are not limited to studies on the results of reconstructive and salvage operations on the disorders of the brain, spinal cord, peripheral nervous system, and muscle diseases.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Acute Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
