

Special Issue

Neuropathic Pain: From Prevention to Diagnosis and Treatment

Message from the Guest Editors

Pain is a complex somatic and emotional phenomenon. Causes of pain are numerous and include traumas, medical diseases, and genetic disorders. The universality of pain as a human experience and the high prevalence of pain underscore the significance of this symptom, while its complexity attracts significant attention from the research community to fully comprehend this experience. Neuropathic pain has a detrimental negative impact on the overall quality of life of pain sufferers and its effective management is crucial. In this Special Issue we welcome original papers, reviews and meta-analyses in all aspects of neuropathic pain, from prevention to diagnosis and treatment.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
