New Frontiers in Psoriasis: From Immunogenetics to the Concept of Endotypes

Message from the Guest Editor

Psoriasis is now a well-known systemic inflammatory disease that heavily impacts patients' quality of life; however, several efficacious treatments are currently available. Despite the latest therapeutic and biological advances, determining the most suitable drug for a patient (precision medicine) continues to be challenging. Recently omics, big data, immunogenetics, and artificial intelligence have contributed to making precision medicine possible; in fact, all these technologies have allowed clinicians to better cluster psoriatic patients susceptible to responding to certain drugs or developing complications. These clusters of clinical, biological, genetic, and therapeutic characteristics depict the endotypes. This new approach is also of paramount importance in order to decrease healthcare costs related to anti-psoriatic drugs unresponsiveness, lack of response, and complications. Within this Special Issue of the *Journal of Clinical Medicine*, we invite you to describe the state-of-the-art for psoriasis care, new therapeutical strategies omics-based, big data, and artificial intelligence contributions in psoriasis precision medicine.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of
Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1
(General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
