

## Special Issue

# Innovations in Parkinson's Disease

### Message from the Guest Editor

Parkinson's disease (PD) is the fastest-growing neurodegenerative disease in the world. By 2050, an estimated 25 million individuals will be affected, an increase of more than 100% since 2020. The rapid rise in both incidence and prevalence of PD will require novel and innovative approaches to identification, treatment, and prevention. This Special Issue will highlight research studies, articles, and reviews that address the unmet needs of people with PD. Articles on any of the following topics, identified by the National Roundtable on Parkinson's Disease, are welcome:

- Diagnostic Advances;
- Therapeutic Innovations;
- Patient Perspectives;
- Disease Prevention;
- Home-Based Medical Care;
- Clinical Care Team Dynamics;
- Clinical Value-Based Care.

Scalable innovations will receive special attention.

---

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
