Diagnosis and Treatment of Salivary Gland Tumors: Current Advances and Future Options

Message from the Guest Editor

Remarkable progress has been made in the treatment of salivary gland disease. In salivary gland tumors with a variety of histologic types, preoperative diagnosis was difficult. Advances in diagnostic imaging and cytology have made preoperative diagnosis more accurate. In addition, improvements in surgical equipment and new surgical techniques are being investigated, and methods to safely and reliably preserve the facial nerve as well as to improve treatment results are being proposed. On the other hand, since distant metastasis is not uncommon in high-grade salivary gland cancer, treatment of recurrence is also important, and new treatments such as molecular-targeted drugs have recently shown efficacy. In this Special Issue, we strongly welcome submissions of articles on clinical advances in salivary gland tumors, both diagnostic and therapeutic.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67081
Strasbourg, France

Prof. Dr. Kent Doi

Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
