

Special Issue

State of the Art of Oral Health in Japan and Other Aging Countries

Message from the Guest Editor

Oral diseases, such as dental caries and periodontal disease, are extremely detrimental to public health, successively known to be associated with various systemic diseases such as cardiovascular diseases, chronic respiratory diseases, diabetes, rheumatism, cancer, etc. It is now widely recognized that oral health cannot be considered in isolation from other health problems. Japan is facing a super-aging society. To this end, one key issue is “oral health”. The improvement of oral hygiene and chewing ability is known to be effective in reducing aspiration pneumonia and improving activities of daily living (ADL). Furthermore, from a long-term perspective, we have to focus on oral health in children and adolescents, not only to survive the super-aging society, but also to improve the oral and general health of the next generation. This Special Issue welcomes manuscripts focusing on the current state of knowledge on oral/dental health in Japan and Other Aging Countries, all original (both of clinical research and basic research) and review articles being welcome. Other accepted manuscript types include methodological papers, case series, brief reports, and commentaries.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
