

Special Issue

Endometriosis: Clinical Advances and Challenges

Message from the Guest Editors

Endometriosis is one of the most common gynecological pathologies. Despite its benign nature, it is linked to extensive clinical, social and health financial burdens, mainly due to its elusiveness and its chronic development pathway. Despite current research efforts, diagnosis and treatment options still remain challenging. Thus, a bold research area exists to be explored in the expectation of improving the way we approach and treat this disease. This Special Issue aims to provide a collection of manuscripts providing an overview of the current and evidence-based knowledge of endometriosis. These should cover all main issues of both endometriosis and adenomyosis, including the diagnosis, classification systems, as well as conservative and surgical therapies for pain and infertility concerns. Manuscripts approaching less-common topics, such as endometriosis during adolescence and menopause, extra-pelvic endometriosis, primary and secondary prevention strategies, new non-invasive diagnostic approaches or complementary and alternative therapies, are warmly encouraged. We welcome both original research articles and reviews.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
