

## Special Issue

# Mental Disorders, Cognitive Impairment and Dementia Among Older Adults

### Message from the Guest Editor

Mental disorders, cognitive decline, and dementia represent critical public health challenges in the context of global aging. These problems profoundly affect the quality of life of older adults and their families, and must be comprehensively understood if effective solutions are to be developed. This Special Issue is dedicated to research on physical or cognitive interventions that aim to address mental disorders, cognitive decline, and dementia in older adults. It seeks to highlight effective multidisciplinary approaches that contribute to the prevention, management, and comprehensive care of these conditions from biological, physical, psychological, cognitive, and social perspectives. We welcome the submission of original research, systematic reviews, and any clinical studies that address mental disorders, cognitive decline, and dementia in older adults.

## About the Journal

### Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
