

Special Issue

Orthopedic Trauma: Diagnosis, Treatment and Rehabilitation

Message from the Guest Editor

Orthopaedic trauma care has undergone major advances in recent years, particularly in the management of fragility fractures, complex pelvic and acetabular injuries, postraumatic bone defects, and amputations. Meanwhile, deeper understanding of biomechanics, biology, and implant characteristics has led to more individualized treatment approaches.

Emerging technologies such as 3D printing, smart implants, artificial intelligence, and computer-assisted planning enable personalized solutions for complex injuries. These innovations, combined with progress in bone regeneration and rehabilitation, improved outcomes across the full spectrum of orthopaedic trauma.

This Special Issue of the Journal of Clinical Medicine welcomes original research articles and reviews addressing recent developments in orthopaedic trauma care. Submissions may focus on clinical aspects of fracture treatment, bone defect reconstruction, pelvic and acetabular trauma, amputation management, and rehabilitation. Contributions exploring the role of new technologies in surgical decision-making, implant design, and regenerative strategies are of particular interest. We look forward to receiving your submissions.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
