Rectal Cancer: Screening, Treatment and Prevention

Message from the Guest Editor

Rectal cancer is a global issue. It is increasingly common and has a huge impact on peoples' quality of life and healthcare systems. Thankfully, technologies such as scanning, less invasive surgery, and new treatments have recently made a real difference for patients. We aim to create a collection of excellent original research and reviews that address every aspect of rectal cancer. This includes everything from screening for the disease and identifying at-risk individuals to treatments and patients' management after they finish their care. We are especially interested in exploring ways to diagnose rectal cancer through personalized treatment plans and how we can ensure patients receive the best possible outcomes. If you have any ideas about how to treat rectal cancer or have made progress in surgery or oncology, we want to hear about it. We seek perspectives on rectal cancer and any contributions that shed new light on how to prevent, diagnose, or treat the diseases.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
