

Special Issue

Bladder Cancer: Surgical Treatment and Prognosis

Message from the Guest Editor

There is a broad spectrum of new developments in the therapeutic armamentarium of bladder cancer. The aim of this Special Issue is to highlight surgical treatment approaches and prognostic and/or predictive biomarkers in bladder cancer. The goal behind this is to identify tools that have a chance to be implemented in new diagnostic and therapeutic algorithms. Original article submissions focused on genetic and epigenetic research, artificial intelligence, surgical techniques, new imaging modalities, and biomarkers are welcome. Review articles are permitted. The articles in this Special Issue are intended to help implement novel methods for everyday clinical approaches to diagnostics and treatment in different areas of bladder cancer.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
