Special Issue

What Part Do Circulating Tumor Cells Play in Cancers⊠

Message from the Guest Editors

Circulating tumor cells have emerged as a pivotal biomarker in cancer research, providing unique insights into tumor biology, disease progression, and treatment response. These rare cells shed from primary or metastatic tumors into the bloodstream offer a minimally invasive window into tumor heterogeneity and dynamic changes over time. CTCs not only serve as prognostic and predictive indicators but also enable the monitoring of therapy effectiveness, detection of minimal residual disease, and identification of emerging resistance mechanisms. Recent advances in detection technologies, single-cell analysis, and molecular characterization have expanded our understanding of CTCs and their subsets, including circulating cancer stem cells, which may drive metastasis and relapse. This Special Issue aims to compile cutting-edge research, reviews, and perspectives on the role of CTCs across various cancer types, highlighting translational applications, novel methodologies, and clinical relevance. By bringing together experimental and clinical findings, we seek to foster a deeper understanding of how CTCs contribute to cancer progression and how they can be leveraged for precision oncology.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine*'s (*JCM*) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andrès

Internal Medicine Department, University Hospital Strasbourg, 67000 Strasbourg, France

Prof. Dr. Kent Doi

Department of Emergency and Critical Care Medicine, University of Tokyo, Tokyo, Japan

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.7 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
