Clinical Advances in Diagnosis and Treatment of Myocardial Infarction

Message from the Guest Editor

Myocardial infarction is a leading cause of death worldwide, resulting from the interruption of myocardial blood flow and consequent ischemia. It is vital to take action in order to lower those risks and prevent myocardial infarction. In recent years, significant transformations have taken place in the treatment and outcomes of myocardial infarction. In the current Special Issue entitled “Clinical Advances in Diagnosis and Treatment of Myocardial Infarction”, and with regard to the new 2023 myocardial infarction guidelines, we invite you to submit articles written from a translational perspective, such as those detailing therapeutic and diagnostic advancements, as well as approaches to myocardial infarction in specific populations. We look forward to receiving your manuscripts.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!
