Current Therapeutic Approaches to Addictive Disorders

Message from the Guest Editor

Addictive disorders represent complex and multifaceted diseases that continue to impact individuals and communities worldwide. Each person's experience with addiction is unique, influenced by factors such as co-occurring mental illnesses, trauma, genetics, and social environments. As a result, professionals in the field employ a range of evidence-based approaches to address the diverse needs of those affected. This Special Issue focuses on the rapidly evolving landscape of addiction treatment, encompassing behavioral, pharmacological, and genetic therapeutic strategies. Recent advancements in artificial intelligence and innovative therapeutic technologies are transforming the way clinicians understand and treat addiction, enabling more precise and personalized interventions. We invite authors to contribute original research articles and reviews that highlight emerging therapeutic approaches for addictive disorders.

About the Journal

Message from the Editorial Board

There has been an explosion of gene and target based research and therapeutics in the multitude of fields that compose clinical medicine. The *Journal of Clinical Medicine's* (JCM) staff and editorial board are dedicated to providing cutting edge, timely, and peer-reviewed articles covering the diverse subspecialties of clinical medicine. The journal publishes concise, innovative, and exciting research articles as well as clinically significant articles and reviews that are pertinent to the myriad of disciplines within medicine. The articles published are relevant to both primary care physicians and specialists. The journal's full-texts are archived in PubMed Central and indexed in PubMed. Please consider submitting your manuscripts for publication to our journal and check us out on-line!

Editors-in-Chief

Prof. Dr. Emmanuel Andr  s

Internal Medicine Department, University Hospital Strasbourg, 67000
Strasbourg, France

Prof. Dr. Kent Doi
